

# How to create a website from Scratch HTML and CSS

<b>Tools</b>	<b>1</b>
<b>Basics setup</b>	<b>1</b>
<b>HTML structure</b>	<b>2</b>
<b>Create HTML Page</b>	<b>3</b>
<b>Responsive NavBar</b>	<b>7</b>
<b>Page Fonts CSS Google Fonts</b>	<b>13</b>
<b>Page Content Styling and Images</b>	<b>20</b>
<b>Footer Columns</b>	<b>29</b>
<b>Add JavaScript for NavBar</b>	<b>39</b>

## Tools

Editor - to write the code

Browser - to view the file rendering

<https://code.visualstudio.com/>

Create an index.html file which can be used as a starting point or entry point for your website.  
This is the main file where all the other files will link to.

## Basics setup

---

# Hello World 2

```
<!DOCTYPE html>
<html>
  <head>
    <title>Website HTML CSS</title>
  </head>
  <body>
    Hello World 2
  </body>
</html>
```

## HTML structure

Use block tags like header, div, footer to separate content blocks.

---

**Header**

**Content**

**Footer**

To apply colors, such as background color and font color, set the property value to either a named value of the color, 'red' or hex value #FF0000 or RGB (RGBA) (255,0,0)  
Use CSS to select the element, then apply property with values to the element.

```
<!DOCTYPE html>
<html>
  <head>
    <title>Website HTML CSS</title>
    <link rel="stylesheet" href="style.css" />
  </head>
  <body>
```

```
<header>Header</header>
<div>Content</div>
<footer>Footer</footer>
</body>
</html>
```

```
header{
  background-color:black;
  color:#fff;
}
div {
  background-color:white;
}
footer {
  background-color:rgba(255,0,0,1);
}
```

## Create HTML Page

Use placeholder content as you develop for a more realistic feel tot the pages.

Placeholder images - <https://placeholder.com/>

Placeholder text Lorem Ipsum Text - <https://www.lipsum.com/feed/html>

Logo

## Header

- [Home](#)
- [About](#)
- [Services](#)
- [Contact](#)
