

Word Counter with Apps Script

```
function counter1() {  
  const doc =  
  DocumentApp.getActiveDocument().getBody();  
  const docText = doc.getText();  
  const docText1 = docText.replace(/\s+/g, ' ');  
  const words1 = docText1.split(' ');  
  const topText = doc.getParagraphs()[0];  
  const wordValues = `Word Counter ${words1.length}`;  
  topText.setText(wordValues);  
  Logger.log(topText);  
  const newText = doc.appendParagraph(wordValues);
```

```
Logger.log(words1.length);  
}
```
